THE WINFIELD NURSERIES
Thos. Rogers
WINFIELD, KANSAS

FOR YOUR INFORMATION

As we invite your orders for the trees and plants we illustrate and describe, you may ask—and surely you are entitled to know—who we are, and what our business record is; how we have served other buyers and why we know we can serve you to your satisfaction and profit. The facts below are to give you that information.

Well Established

The Winfield Nurseries were founded over forty years ago. It is not uncommon to hear of some nurseries that have been in the same family for generations. Ours is no exception. The personnel of our organization started working in the nursery as boys, as have also most of our present employees.

Our growth has been gradual, but steady, to meet both in quality and kind, the increased demand of buyers. Our big plantings in the Arkansas River Valley in southern Kansas, favored by fertile soil, are also disciplined by climate that produces the best and hardiest trees and plants, thrifty and full of vitality.

Packing, Shipping and Storage Facilities

Our packing, storage and shipping facilities have kept pace with the growth of the business. We have one of the most modern equipped packing and storage nursery plants in the middle west. This assures you that your order will reach you in good, fresh condition. Our whole output is handled under cover at all seasons of the year—a part of our progressive methods that guarantees the freshness, grade and quality of our stock. We have ample shipping facilities out of Winfield: the Santa Fe, Southern Kansas, Frisco and Missouri Pacific railroads running several trains daily in all directions. The Railway Express Agency, Inc., carries express over all lines.

What We Agree to Do

We take all risks of transportation and guarantee the delivery of stock in good order. If not in first-class condition on arrival notify us and we will immediately forward new stock to take its place under the same guarantee. Should any plant die during the first season after planting, having had good care under a normal growing season, we will replace same at one-half the purchase price.

Reference

As to our financial responsibilities we refer you to the First National Bank or any business house of this city. As to fair dealings and trustworthiness we offer you any of your friends who may have purchased stock of us heretofore. Your neighbor may be one of our customers. Ask him.

Stock Healthy and Free From Pests and Disease

State Inspectors examine our stock of trees regularly and thoroughly and every shipment that goes out bears an official certificate of inspection.

Non-warranty—In the event that any stock sold by us should prove untrue to name under which it is sold, we hereby agree on proper proof of such

untruthness to name, to replace that portion of the order proven untrue to name or to refund twice the purchase price thereof. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, productiveness, or any other matter.

Prices

Prices quoted herein mean that the specified stock will be packed free of charge and delivered in good condition to the transportation company. Our quality plants are priced low, so get your order in early while we have a surplus in all varieties.

How to Ship

Orders will be shipped by freight, express, or parcel post (for small orders of grape vines, blackberry plants, etc.) as you wish. It is best, however, that most orders be shipped by express as this service is prompt and satisfactory, delivery being made to you at once within a few hours after leaving the nursery. Freight shipments, being slow, there is some danger of the stock drying out. Our fruit trees are too large for parcel post shipment.

Transportation Charges

We prepay transportation charges on all orders amounting to \$25.00 or more.

Time of Shipment

Please advise the approximate time you want your order shipped. We will ship your order as nearly as possible on the date you indicate. You must remember that we are governed in this matter by weather conditions. You may be assured that we will use our best judgment and will advise you beforehand as to the shipping date, that you may be looking for the shipment. Our shipping season opens in the fall about October 20th and closes in the spring about May 20th. While you have plenty of time in the spring to plant it is advisable to have your stock ordered and set it out as early as the weather will permit.

Remittance

Should be made by post office or express money order, bank draft, or we will take your personal check, if you prefer. Do not send currency, as it is unsafe.

Entomological Commission of Kansas,
Office of State Entomologist, State University,
No. A-3109, Lawrence, June 10, 1937.

Certificate of Nursery Inspection—This is to certify that in accordance with Section 2-703 of the Revised Statutes of 1923 the nursery stock now growing for sale by Winfield Nurseries of Winfield, Kansas, has been inspected by a duly authorized inspector, and found apparently free from dangerously injurious insects or plant diseases.

Invalid after June 1, 1938.

H. B. HUNGERFORD,
State Entomologist

January, 1938

TO OUR FRIENDS AND CUSTOMERS:

Dear Folks:

That we might show you the Winfield Nurseries, that parent garden of the flowering and fruiting stock that is being sent out under our labels, has often been our wish. Such a trip being impractical to most of you, we are doing the next best thing, presenting you with our Catalog of Fruits and Flowers--bring the Winfield Nurseries to you, within your grasp, your range of vision--and in this crude way point out to you the untold possibilities and beauty that may be derived from Rogers' trees and plants.

We offer you sound, healthy stock, potential in bloom and fruitage, and by reason of special training and long experience we can aid you in your choice. Yours, however, is the privilege of selecting, planting, caring and storing up that most delightful and responsible of vocations. Order abundantly today with thought for future needs, that you and yours may harvest with both pleasure and profit.

Thanking you for your past business and awaiting your early orders, which, we assure you, will receive our prompt attention and careful consideration, and with best wishes to you all for the coming season,

Very sincerely,

THE WINFIELD NURSERIES

Per Thos. Rogers

EVERGREENS

A judicious planting about the home indicates refinement as well as increased selling value.

ARBOR VITAE (Berckman's Golden)—

This is without a doubt the showiest of all the Arbor Vitae family. The color is an unusually bright green, turning to a golden-yellow in the winter months, and is striking in appearance. Our Berckman's Golden are dwarf, very seldom growing over four feet in height, are compact and dense, never needing any pruning as they make and hold their own shape. Does especially well and should be in every planting. Berckman's Golden require sunshine. 18- to 24-inch size, \$2.50 each. 24- to 30-inch size, \$3.00 each.

ARBOR VITAE (Chinese Compact)—

Dense, compact, upright grower. Very excellent for yard plantings. Absolutely hardy, requiring very little attention. 2- to 3-foot size, \$2.00 each; 3- to 4-foot size, \$3.00 each.

CANNART JUNIPER—A compact grow-

ing deep rich green foliated variety of Cedar. It grows pyramidal in shape. The trees bear blue and silver colored berries. Gets 10 to 12 feet in height. A real beauty. 3 to 4 feet at \$4.00 each, 4 to 5 feet at \$5.00 each.

BLUE CEDAR (Virginiana Glauca)—Is

a rapid grower, specimen tree, becoming 15 to 20 feet high. Has a striking silvery blue color. 3 to 4 feet at \$3.50 each, 4 to 5 feet at \$4.50 each.

JUNIPER CHINENSIS (Chinese Juniper)—A small tree of columnar form

with silvery-green foliage. It is entirely hardy, retaining its dense and graceful habit well under any decent treatment. 2- to 3-foot size, \$2.50 each; 3- to 4-foot size, \$3.00 each.

EVERGREENS (Contd.)

COLORADO SILVER JUNIPER—A native of Colorado, being very hardy, symmetrical and upright growing. The leaves have a uniform silver green color. The tree attains a natural height of 12 to 15 feet. 2- to 3-foot size, \$3.25 each; 3- to 4-foot size, \$4.50 each.

JUNIPER, VIRGINIANA (Red Cedar)—This well-known native variety grows to a tall, stately green, with dark green foliage. It is excellent for naturalizing, but may also be kept sheared to any desired height or shape. 2- to 3-foot size, \$2.50 each; 3- to 4-foot size, \$3.00 each; 4- to 5-foot size \$4.00 each.

JUNIPER (Savin)—Prostrate spreading branches with sombre green foliage. Hardy and well adapted for hillsides, etc. 24- to 30-inch at \$2.00 each, 30- to 36-inch at \$2.50 each.

For Windbreak CEDAR SEEDLINGS

8 to 12 inches, puddled

15c each

\$10.00 per 100

PFITZER JUNIPER—This tree grows in the form of a low inverted pyramid. Foliage is of a feathery type, uniform even green and thrives just as well in a hot dry situation as in the cooler temperature of the north. Will stand shade, too. 18- to 24-inch at \$2.00 each, 24- to 30-inch at \$2.75 each, 30- to 36-inch at \$3.50 each.

Write for prices or drive to nursery for other kinds and large size trees.

ROSES—Everblooming, Ever Beautiful

Our Sturdy Field-Grown Roses Will Please You

The Rose is acknowledged Queen of the Garden; in color and fragrance, in refinement of texture and form, in the great range of variety, our Rose is pre-eminent as the loveliest of flowers. The varieties we grow are the best in each class; not all the good ones—because there are thousands of varieties in cultivation—but no better list could be made up in any equal number of varieties. Our selection has had in mind to offer Roses that are distinct, that possess quality of individual bloom, abundant yield and have the hardiness required for our climate. Our Roses are strong, healthy, two-year, field-grown plants.

We feel free to say that our roses this year will please our most fastidious customers. They are all grafted to variety, and have good strong roots and a well-balanced top. They are guaranteed free from disease and in good healthy condition. We solicit trial orders to patrons that contemplate rose gardens, rose hedges, specimen planting or trellis plantings.

J. L. Mock Pink

Hybrid Teas to Bloom This June

Don't know of anything as popular as the rose and it's rightfully so. Every variety that I'm listing has proven itself. These are all big husky 2-year plants guaranteed to bloom the first season. My nurserymen are rose specialists and you get finest, best cared for plants you can buy—all pruned properly, ready for planting.

MONTHLY EVERBLOOMING ROSES

Blooms From May Until Late Fall Frosts

Rogers' Collection of Beautiful Roses—Perfectly Hardy
A Success Everywhere

BIG TWO-YEAR PLANTS—EXTRA HEAVY NO. 1

Finest 2-year No. 1 Plants That Will Bloom Freely This Year

AMI QUINARD—The flowers are graceful, semi-double, a rich very dark crimson-maroon. Unquestionably one of the best dark roses. Free blooming.

BETTY UPRICHARD—Inner petals delicate salmon-pink, outer petals deep carmine shaded copper. Large flower, delightfully rolled petals.

CALEDONIA—The exquisite long buds of ivory change to purest white as the flowers open into large, double blooms of velvety texture. One of the best whites.

DAME EDITH HELEN—Magnificent globular form with many rows of petals which curl back artistically, holding steadily a vivid rose-pink.

DUCHESS OF WELLINGTON—One of the most popular yellow garden roses. Intense saffron-yellow, stained with deep crimson, changing to a deep coppery yellow as the flowers are fairly full, with large petals, great substance, delightfully fragrant and very free-flowering.

EDITH NELLIE PERKINS—The long pointed buds on long stems open into perfect flowers of orange-cerise outside and inside of salmon overspread gold. Grows vigorously and blooms freely.

E. G. HILL—Long, pointed buds, with high-centered, very double blooms. Dazzling scarlet with maroon colored velvety surface. One of the best red roses.

ETOILE DE FRANCE—Garnet-red with velvety surface, shading to a vivid cerise at center. Very large, full, fragrant flowers. Blooms continuously.

ETOILE DE HOLLANDE—Immense bloom of deep crimson-maroon. Broadly rolled petals fold away from high, rounded center. Strong grower. An extraordinary good bloomer.

FRANCIS SCOTT KEY—Deep, glowing red, shading to cerise. Extra large, with a profusion of petals surrounding a high center. Richly perfumed. Extra hardy.

FRAU KARL DRUSCHKI—This is a hybrid perpetual type, blooming profusely in June and again in the late fall months. This rose is also known as Snowqueen and White American Beauty. It is pure white, exquisitely formed in bud and open flower; blooms most abundantly and is considered by everybody as the best white rose.

J. J. L. MOCK—Immense blooms of broad petals rolling outward in majestic form. Cherry-carmine outside, silvery pink inside petals. A very free bloomer and absolutely hardy.

JULIEN POTIN—(Golden Pernet)—Perfect flowers of bright yellow. Hardy, free blooming, fragrant.

KILLARNEY DOUBLE WHITE—One of the best everblooming white roses.

E. G. Hill

Prices

ALL EVERBLOOMING ROSES LISTED

40¢ Each—3 for \$1.10—6 for \$2.10—12 for \$4.00

K. A. VICTORIA—This splendid rose should be in every garden. In color it is a soft pearly white, tinted with just enough lemon in the center to relieve the white; remarkably fragrant and has beautifully formed flowers on long, graceful stems. It is a strong, free, and healthy grower.

LADY HILLINGDON—Another exquisite rose with long pointed buds. The blossoms open up very double, and are of a beautiful deep apricot-yellow. It is an excellent bloomer and in every way a very fine rose.

LADY MARGARET STEWART—Golden yellow, splashed with bright red, inside and out. High-centered, full flower. Charmingly dainty.

MARGARET McGREDY—Carmine-rose, approaching a rich oriental-red at end of petals. Large, long-lasting flower with spicy scent.

MRS. CHAS. BELL—Soft shell-pink with salmon background and silvery surface. Full, globular shape. Continuous bloomer. Hardy. It is a thrifty grower.

MRS. HENRY BOWLES—A favorite pink at the World's Fair. It is large, full, deep pink and the blooms are on long stems. Always in bloom.

RADIANCE PINK—Brilliant, rosy-carmine. The buds are perfect and while the open flowers are not so large nor so full as those of some other varieties that produce only a few extra large blooms, nevertheless Radiance is today one of the most satisfactory ever-blooming pink roses, because it is one of the hardiest and always abundantly in bloom.

SUNBURST—A most magnificent rose. The color is superb, orange golden.

TALISMAN—A gorgeous combination of gold, rose, apricot, and blood red. Long shapely buds open to uniquely pointed petals. It is a very free bloomer.

WILLOWMERE—This rose is a bright shrimp-pink toning to a cream-pink at base of petals. Very hardy and is a good bloomer.

Talisman

ROSES BY COLOR—1 Red, 1 Pink, 1 White, and 1 Yellow, our selection of varieties, special, 4 for \$1.50.

MRS. HENRY MORSE—Bright shrimp to salmon-pink blooms, with silvery shadings. Lovely pointed buds. Long lasting and is a free bloomer.

MRS. PIERRE S. DUPONT—One of the most popular yellow roses at the World's Fair. It is a glorious bright golden yellow of large size and many petals.

OPHELIA—White, tinted and shaded with salmon, pink, and yellow. Entirely unique and lovely both in bud and full flower.

PRESIDENT HERBERT HOOVER—This is one of the most hardy roses we have. It is a strong grower and always in bloom. It is a vivid cerise-rose, softly suffused with yellow, orange, and scarlet. Be sure to plant this rose in your collection.

RADIANCE RED—Similar in every respect to the Pink Radiance, of which it is a sport, differing only in color, which is a red red that does not fade with age.

ALL EVERBLOOMING ROSES LISTED

40¢ Each—3 for \$1.10

6 for \$2.10—12 for \$4.00

BABY DWARF ROSES

Prices 40c each or 3 for \$1.00

- HYDRANGEA, P. G.**—Blooms first are white turning to pink. Needs sun. Flowers are panicle shaped. Two year, 50c each.
- SYRINGA (Mock Orange)**—Flowers resemble orange blooms. 50c each.
- SYRINGA, Virginalis**—Well shaped shrub. Double white flowers. Blooms entire summer. 50c each.
- PRUNUS PISSARDI**—Brightly colored, leaves purple. A distinct and handsome shrub. Flowers white. Will attract attention. 45c each.
- PRUNUS TRILOBA**—A charming shrub. The whole tree is decked in a fleecy cloud of very double light pink blooms before the leaves appear. 2 to 3 ft., 40c each; 3 to 4 ft., 60c each.
- KERRIA JAP.**—Flowers double, rich yellow. Resembles small Mums. Blooms all summer. Likes shelter of house or building. 50c each.
- WEIGELA, Rosea**—Flowers are produced so thick they almost hide the limbs. Grows 5 feet tall. Flowers pink. 50c each.
- WEIGELIA, Eva Ratkhe**—Deep carmine-red flowers. Blooms all summer. 50c each.
- SNOWBALL**—An old time favorite with snowy white ball shaped flowers. Nice two-year plants 50c each.
- TAMARIX (Hispidia)**—The best of all Tamarix varieties. Foliage soft blue-green; flowers delicate pink. Fine for cutting with roses. 50c each.
- SPIRAEA VAN HOUTTEI**—Very graceful, spreading shrub. Most popular of all the spireas. Masses of lacy white flowers early spring. Small size, 10c each; medium, 20c each; large 40c each.
- SPIRAEA ANTHONY WATERER**—Dwarf shrub. Fine for borders and edging. Flowers red all summer blooming period. 40c each; 3 for \$1.00.
- SPIRAEA FROBELLIA**—Same as Anthony Waterer only taller and flowers not so bright. 40c each.
- SPIRAEA THUNBERGI**—Small early bloom. Foliage very pretty and soft. Large, 45c each.

HARDY CLIMBING VINES

TRUE BITTERSWEET—Bittersweet is a native climber with handsome, glossy green leaves and very attractive orange colored fruit that comes and stays on all Winter. I have one on my garage which in two years has covered the entire south side of the building. 50c each.

CLEMATIS—This is one of the most attractive and effective of the hardy flowering climbing vines. Especially adaptable for covering trellises, fences, walls and pillars.

Henryii—Flowers large and creamy white, from six to eight sepals. 75c each.

Jackmani—Covered from July to October with a dense foliage of purple flowers. A strong grower and a popular variety but very hard to get started. 75c each.

Paniculata—Flowers are medium in size, pure white, borne in immense sheets, and of a most delicious and penetrating fragrance. 50c each.

HONEYSUCKLES—All are rampant growers, forming great masses of vines that require sunlight and fail to form leaves in the shade. All are fragrant. 50c each.

Hall's Japan Honeysuckle—A strong, vigorous, almost evergreen sort, with pure white flowers, changing to yellow. Covered with fragrant flowers

from July to December. Holds its leaves till January. The best bloomer of all.

Monthly Fragrant Honeysuckle — Blooms all summer; red and yellow; fragrant.

Scarlet Trumpet Honeysuckle—Strong, rapid grower, producing scarlet in-odorous flowers.

IVY VINES—**Boston Ivy**—Leaves small and dainty, ivy-like in form. By overlapping each other they form a dense sheet of green. The plant requires some protection the first winter until it becomes established. Will climb any kind of a wall. 75c each.

Engelmann's Ivy—A rapid-growing vine of the Virginia Creeper family but having characteristics of its own. Leaves are smaller and many more of them than those of the Creeper. Foliage of deep green. Will cling only to a rough surface such as brick or stone. 50c each.

WISTERIA (Purple)—The Wisteria is one of the most decorative of vines, and for porch decoration without too much shade it has no superior. It is a beautiful climber of very rapid growth, producing long, pendulous clusters of pale blue flowers in June and sometimes again in the fall; is perfectly hardy and one of the most superb climbing vines ever introduced. 50c each.

PLANTS FOR ORNAMENTAL FENCES

There is no better line of improvement that can be put upon a property than a well-kept hedge. A living fence—one made from growing plants, attractive with their green leaves, formal trained or arched branches, colored foliage or bright berries—is surely more pleasing than the still, rigid, mechanical effect obtained by the similar use of wood or metal.

To be a success, a hedge must be intelligently set and properly cared for. Start with vigorous plants of an even grade. Dig a trench, and set the plants evenly and tread the soil firmly around them. After they are planted, cut down to one level. Cut two-thirds of the top back. Set 10 to 12 inches apart.

AMoor RIVER PRIVET—For neatly-trimmed formal hedges about the lawn, no shrubs are more popular than the privets. The varieties we grow are ideal fence plants. They withstand frequent shearing and the more often they are trimmed, the better they look. Every lawn should have its boundaries marked by a row of our Privets, neatly trimmed. Our Amoor River Privet is very hardy, with glossy green foliage and holds its color almost the entire year. It will stand shearing to any extent.

CALIFORNIA PRIVET — This most popular hedge plant is of a free, upright growth, with glossy dark green leaves. Nearly evergreen in the Southern states. After setting, prune to within 4 to 6 inches of the ground, also prune severely the next one or two seasons after planting to maintain the height and shape desired. California Privet has a tendency to winter-kill north of Oklahoma.

Per 100
Good plants, 12 to 18-inch \$ 6.00
Heavy plants, 18 to 24 inches 10.00

HARDY HERBACEOUS PERENNIALS

ARTEMISIA (Silver King)—Silvery stems and foliage. Good for summer and winter bouquets. 30c each; 3 for 75c.

BABY BREATH—Dense, spreading plant. Tiny feathery panicles. Delicate foliage. Fine for bouquets, and drying. 25c each.

CHRYSANTHEMUM—The hardy "Mums" bloom profusely in October after everything else in the garden has been killed by frost. Yellow, pink and white, 25c each.

COREOPSIS LANCEOLATA—Flowers are rich golden-yellow, borne in great profusion nearly the entire summer. 20c each.

GAILLARDIA—Daisy-shaped flowers with orange tipped petals shading to scarlet in the center. Bloom all summer. Need sun. 20c each.

GOLDEN GLOW—Golden-yellow dahlia-like flowers borne on tall swaying stems. Blooms summer and fall. 20c each; 3 for 50c.

PERENNIAL SWEET PEA—One of the best and desirable flowering, hardy, climbing vines, growing to the height of 8-10 feet. Blooms all summer. Fine for cutting. Colors: red, white, pink and purple. 25c each.

PHLOX—Most popular perennial. Thrives anywhere. Colors, shades of red, pink, white and purple. 25c ea.; \$2.00 per doz.

Phlox Collection Special

2 Red, 2 White, and 2 Pink for \$1.00
4 Each of Red, Pink and White for \$1.75

SHASTA DAISIES—Very well known. Double white flowers. Very good plant. 25c each; 3 for 60c.

BULBS

CANNAS—We have them in several colors. Large flowers. We have pink, red and yellow shades. 75c per dozen.

ROYAL IMPERIAL—A crimson red. Sends up several stems, each bearing many flowers. It is freest bloomer of lilies. Needs sunlight. 50c each; 3 for \$1.40.

TIGER LILY—A well-known old lily that is dependable. Light salmon with red spots; blooming in July. 25c each.

GLADIOLAS—Mixed colors. 50c per dozen; \$3.50 per hundred.

DAHLIAS—Too well known for description. Red, pink, white, yellow. 20c each; 6 for \$1.50.

PEONIES—Selected to color. Dark red, light red, dark pink, light pink, white. 40c each; 6 for \$1.95.
Large size, 50c; medium, 35c; small, 25c.

LILIES, Regale—Hardy in all locations. Very fragrant odor. Grows 4-5 feet tall. Large trumpet-shaped flowers. White on the outside and yellow inside. Large size, 50c; medium, 35c; small, 25c.

Ornamental Grasses

HARDY PAMPA GRASS—Height, 10 feet. Long plumes. Small division, 15c; clumps, 35c.

EULALIA GRASSES—Graceful foliage. Height, 5 feet. Plumes appear in fall and will keep all winter. Division, 15c; clumps, 35c.

VISIT WITH US

We extend one and all an invitation to visit us at any time of the year. "Our door is always open and the key is thrown away." Should you wish to come when certain flowers are in bloom, advise us and we will tell you when the blooms are at their best.

Plant Bleeding Heart Among Your Evergreens, Roses and Hardy Shrubs

It is an old-fashioned favorite. Its arching stems bear drooping heart-shaped flowers of white and rose-red. It is perfectly at home in any part of the hardy border and especially valuable for planting in shade. Set among Evergreens it gives a splendid contrast and is very effective. Very rare. Each 50c.

Everyone Can Now Afford to Plant at Our New Low Prices

ORNAMENTAL SHADE TREES

American Elm

The recurring droughts have proven it is necessary that more trees be planted. The Government is doing its part, and it is up to us to help. Plant more and more trees, but be sure that they are nursery grown and have been inspected against scale and other tree diseases. Do not buy your shade trees of every "tree peddler" and "tree trimmer" who can only offer you a "creek dug" elm, but buy only from a good recognized nursery or through the nursery's authorized salesman who can show his credentials from that nursery, together with a strong guarantee that the trees have been inspected by your state officials and found to be free from disease.

RED BUDS—3 to 4 feet 75c each, 4 to 5 feet \$1.00 each.

MAPLE (Soft or Silver)—A hardy, rapid growing native tree of large size, valuable for producing quick shade. Excellent for street planting. Nice specimen trees, 6- to 8-foot size, \$2.00 each.

ELMS (American White)—One of our best native trees, making a beautiful lawn or street tree, growing to be about 50 to 75 feet high; with drooping, spreading branches. We are fortunate to have a nice lot of these, despite the severe droughts of the

past several years. We will fill your orders with only the best, A-1 straight, smooth, and well-rooted trees. Compare these prices with those you will pay elsewhere.

	Each	Dozen
6 to 8 feet	\$0.75	\$ 8.00
8 to 10 feet	1.35	12.50
1¼ to 1½ inch caliper	1.60	18.00
1½ to 2 inch caliper	2.25	24.00
2½ to 3 inch caliper	3.50	

ELMS (Vase Shape)—An American Elm with vase formation of limbs. Uniform type, because all are "budded" from an original tree. This tree is a very rapid growing Elm and is also a distinct and improved variety over our American Elm. While the price of this tree may be a little higher than our American Elms, yet we believe it to be worth much more in the long run. This variety is resistant to borers and other insects of the common Elms.

	Each	Dozen
6 to 8 feet	\$0.85	\$ 9.00
8 to 10 feet	1.50	15.00
1¼ to 1½ inch	1.75	18.00
1½ to 2 inch	2.50	26.00
2 to 2½ inch	3.25	

ELMS (Chinese)—The tree that is fast becoming "America's Most Popular Elm." We are offering only the very best of straight, smooth, well-rooted trees, with no forks in the tops, in this remarkable variety at the low prices which you will find less than one-half the price offered by any nursery for a tree of this character and quality.

Prices on Chinese Elms

We grow only the drought-resistant strain.

Hard Wood Trees

LINDEN—A round-headed tree with large heart-shaped, bright green foliage. A fairly rapid growing tree and one of our prettiest of the hard wooded varieties for use in southern Kansas and northern Oklahoma. Very good trees running 6 to 8 feet high at \$2.25 each.

MAPLE (Sugar or Hard Maple)—A splendid hardy ornamental tree with foliage turning bright orange to scarlet in the late autumn. Nice trees running 6 to 8 feet high at \$2.25 each; 8 to 10 feet high at \$3.00 each.

ORNAMENTAL SHADE TREES (Contd.)

OAKS (Pin)—This tree is of fairly rapid growth with leaves deeply cut, and the leaves color beautifully in the late autumn. This variety transplants a lot more readily than most of our local Oaks. 8- to 10-foot size at \$3.25 each.

CATALPA BUNGEII (Umbrella Catalpa)—Just the tree to be used for formal effect. Propagated on a stem of the Catalpa Speciosa. It makes a very unique ornamental tree. Has a broad dome-shaped head at the top of a long straight stem. When the tree attains its full growth the top is often 15 feet in diameter, on top of a strong stem from 7 to 8 feet in height. An exceptionally hardy variety. Extra nice hardy specimens at \$2.00 each.

WILLOWS—A tall spreading tree with long drooping branches and narrow, dark green leaves. It is a very imposing tree of graceful beauty. This tree prefers a moist location and is at its very best when planted near a pond or stream. If you have a fish pool or a small pond in your garden, don't overlook planting one of these beautiful trees somewhere in the background of your flower garden. We have several varieties to offer and suggest the following as the best.

Wisconsin Weeping Willow—The most hardy of the many varieties of Weeping Willows. This tree is a rapidly growing sort with long pendulous branches. We have these in 5- to 6-foot size at \$1.50 each; and 6- to 8-foot size at \$2.00 each.

Niobe Weeping Willow—This is an exceptionally strong, hardy growing, graceful tree and of splendid drooping habits and it is very attractive and is of golden bark. This variety is a trifle higher than most Weeping Willows but on account of its beauty and hardness it is worth much more. We have these in nice 6- to 8-foot size trees at \$2.00 each and 8- to 10-foot size at \$3.00 each.

PUSSY WILLOW—A very popular willow on account of catkins in March or April before the leaves form. This can be used as a shrub in your screen or border or may be planted as an individual specimen. 2- to 3-foot size, 40c each; 3- to 4-foot size, 60c each.

Poplars

POPLARS—Lombardy. This is a very tall growing variety, pyramidal in form. This tree is especially valuable for landscape planting and is used freely for screens and hedges. The trees we grow are branched very low to the ground, making them doubly valuable for this purpose.

	Each	Dozen
5 to 6 feet.....	\$0.40	\$ 4.25
6 to 8 feet.....	.60	6.00
8 to 10 feet.....	.75	7.50
10 to 12 feet.....	1.00	10.00

Lombardy Poplar

Ask us for any kind or sizes of any trees not listed in our catalog. We have several other kinds; and many larger and smaller sizes in the varieties listed.

Nut Trees

PAPER SHELL PECANS—The demand for these nuts increases from year to year. The Pecan has, by means of selection, been made to produce the fine thin-shelled, large fruiting varieties. We recommend for your use the Stuart and Success thin-shelled varieties. Nice well-rooted trees, 2 to 3 feet, at 90c each.

THOMAS BLACK WALNUTS — A grafted type. The tree grows twice as fast as the ordinary Walnut. Transplants easily and is very hardy. The nuts are large and of good flavor. The best in well-rooted trees, 2 to 3 feet, at \$1.00 each.

FOREST TREE SEEDLINGS

Our forest tree seedlings are one-year nursery-grown seedlings, nice straight smooth trees and at the attractive prices we are offering no farmer can afford to do without these. Set out a thousand or more as a hedge or in a grove, to serve as a windbreak for protection for your stock and buildings, or to grow into post timber or forest trees. The expense is very small, and while it pays you well to have shade for your stock and grow your own posts, the added valuation, which these trees will add to your farm, will mean much to you.

ASH—An excellent, symmetrical, clean, healthy tree of rapid growth and long life that will thrive even under city conditions.

	Per 100	Per 500	Per 1000
6- to 12-inch size	\$0.50	\$2.25	\$4.00
12- to 18-inch size	.80	3.50	6.50

CATALPA SPECIOSA—It is hardy, grows rapidly on prairies, resists drought remarkably well and has hardly any insect enemies. As a post timber it ranks with the Black Locust and Osage. Fine for groves.

	Per 100	Per 500	Per 1000
6- to 12-inch size	\$0.65	\$2.75	\$5.00

12- to 18-inch size	2.00	7.50	13.00

RUSSIAN MULBERRY—The best for hedges, post wood, or timber. Plant around your barns in a grove for protection for your stock. Can be used to plant as a hedge around your cherry orchard as the fruit ripens about the same time as cherries and the birds prefer the mulberry fruit.

	Per 100	Per 500	Per 1000
12- to 18-inch size	\$2.00	\$ 7.00	\$12.00
18- to 24-inch size	3.00	12.00	18.00

OSAGE ORANGE (Bois d'Arc)—Often called hedge plants. A valuable tree for its timber, posts of this wood being almost indestructible. It is planted more for hedges on farms than any other hedge plant, as no animal can penetrate it. It stands pruning well and makes a beautiful and effective hedge.

	Per 100	Per 500	Per 1000
6- to 12-inch size	\$0.60	\$2.50	\$4.25
12- to 18-inch size	.85	3.75	7.35

Plant our large, husky, well-rooted forest tree seedlings for groves, hedges, etc. You need them for windbreaks and post timber.

PLUMS

Sapa Plum

Plums are especially good for eating fresh, for jellies and preserves, and are unexcelled for canning. Some varieties will thrive wherever apples or peaches can be grown. Most of them, especially the northern Hansen types, bear the third or fourth year. One of the best fruit trees for the home garden, and very profitable in the commercial orchard.

First Class Stock in Every Particular

Prices

Height in feet	Diameter in inches	Each	10	100
2 to 3	$\frac{5}{8}$ to $\frac{7}{8}$	\$0.30	\$2.50	\$20.00
3 to 4	$\frac{7}{8}$ to $1\frac{1}{8}$.45	4.00	35.00
4 to 6	$1\frac{1}{8}$ and up	.65	6.00	55.00

OPATA—One-year-old trees set fruit buds freely. Our largest size trees will bear the year following transplanting. This variety is a cross between Sand Cherry and the Gold Plum, for which \$3,000 was paid when first introduced. The tree resembles the plum in its habit of growth. The fruit is one inch or more in diameter; small pit. It is a dark purplish-red, with blue bloom.

SAPA—Medium to large size, purple plum with purple flesh full of rich juice of fine flavor, ripening a few days after Opata. Very fine for canning. Bears next year after planting and bears regular heavy crops and does well everywhere, North, South, East, West.

WANETA—A northern variety. The fruit is bright red, measuring almost two inches in diameter. Recommended for dry climate and where the frost is a habitual visitor. Very hardy and an exceedingly heavy bearer, as it never misses.

ABUNDANCE—The tree is small, but hangs loaded down with fruit. The fruit should be thinned to allow room for development. It is one of the hardiest and best of the Japanese varieties. The fruit is large, oval and in color amber, changing to cherry. The quality is very good.

BURBANK—The Burbank is a later and somewhat more vigorous variety than the Abundance. It is a dark red, roundish Japanese plum and of good quality. The flesh is a deep yellow, firm, very juicy and sweet. It is considered to be the hardiest and most prolific of the Japanese varieties.

COMPASS—This variety will probably bear more fruit in a shorter time than any other fruit tree. Commences bearing next year after planting and bears heavily every year. The red fruit is juicy and makes fine sauce. Grows everywhere, very hardy.

Compass Cherry-Plum trees bear extremely early, always, if the season is at all favorable the year after planting. Compass Cherry-Plum is an annual bearer and very hardy. It is indeed an extraordinary Cherry-Plum of which too much praise cannot be given.

We grow our stock and know its merits when we catalog it.

MOORPARK—The fruit is large, orange color with a red cheek. Sweet and rich. A freestone. Ripens in early July. Fine quality.

OKLAHOMA—A variety being propagated by us from a hardy strain offered by one of our Oklahoma customers, who says that it has borne fruit almost every year. It is of good size, quality and color good.

SUPERB—One of the best of the Apricots being offered. It is of Kansas origin. It is especially adapted to Kansas and its territory. Ripens after Moorpark.

CHERRIES

You remember, of course, the big, rich, juicy Cherries for which you climbed the tree when a boy. Why deprive yourself and your children of the same pleasure today? You can have all the rich, juicy Cherries you wish if you will plant some of our justly famous Kansas Duke Cherry trees.

Remember, too, the Cherry made the pie famous, and who doesn't like Cherry pie?

Cherries are one of the most popular fruits. Its hardness, and the fact that it bears annually are strong recommendations. The cherry can be grown on any kind of soil, but prefers a moderately heavy loam. The soil must be well drained. Cherry trees will do better under neglect than any other fruit tree. They need very little attention after transplanting; no pruning and very little spraying. They come into bearing the third or fourth year after planting.

MONTMORENCY—With Early Richmond, it is the most widely and numerously planted cherry and the most productive and regular bearer. Colors early before ripe. The fruit is roundish, plump, flattened at the end, and a beautiful glowing-red. It hangs in clusters. The flesh is rich and pleasant; of reddish color, tender and firm. A good shipper and canner. The tree is a vigorous, upright grower, but

will not quite equal Early Richmond in production qualities. Ripens about the second week in June.

EARLY RICHMOND—Sometimes called the Early May Cherry. It is the favorite early cherry and next to Montmorency, the most popular of all the sour cherries. The fruit is of medium size, roundish shape, flattened at the end; flesh light color, tender and sprightly. A good canner. The tree is medium size, vigorous, upright, spreading, productive and long-lived. Ripens about a week earlier than Montmorency. We suggest that you set one-half of your sour cherries to this variety and the other one-half to Montmorency.

KANSAS DUKE—Our Kansas Duke is a large semi-sweet cherry of deep red color, juicy and rich. The flesh is reddish. The fruit is of the best delicious flavor and is very excellent for eating fresh.

Plant a Kansas Duke cherry if you have room for only one tree. The tree is especially attractive as it is an upright, compact grower, which together with the heavy dark green foliage, makes it a beautiful tree for lawn planting. The Kansas Duke is a prolific bearer and the abundant crops make it especially desirable for home use. It is the nearest sweet cherry that is a success in this climate. Ripens about a week before Montmorency.

PEACHES FOR CANNING AND EATING

COLD-RESISTING DRY WEATHER VARIETIES

The peach is a great tree for dry climates. These varieties are hardy, productive, and early bearing. These usually come into bearing in three years.

The finest flavored and best peaches are those picked fresh from your own orchard trees. Just think, only a few cents a tree now and one crop pays for the tree many times over. These are the hardy abundant fruiting varieties. Plant only 15 feet apart. Use them as fillers in apple orchards until the apples come into bearing. 3 to 4 ft. 25c each (in lots of 25).

Elberta Peach

BELLE OF GEORGIA—A creamy white peach with a beautiful crimson cheek, grown largely for a commercial peach, but should be in every home orchard. The trees are hardy, vigorous, and very productive. Not quite as good a quality as Champion. Ripens a few days before Champion.

CARMEN—It is a real white peach and ripens before other white peaches. Very hardy in the bud, missing frost when others fail. You will like this peach. Freestone and good canner.

CHAMPION—Considered the highest in quality of all white peaches. Flesh tender and juicy, with pleasant flavor. Skin is a creamy white with splashes of carmine and red. Tree is vigorous, healthy and productive. Ripens in late August or early September.

CHINESE CLING—A large globe-shaped, creamy white peach with red cheek. The best of all clings in our opinion. Ripens around first of September.

ELBERTA—The standard market peach of the entire country. Very large Yellow with red blush; flesh is yellow, tender and juicy; very highly flavored. Rank, vigorous grower. Does well in all peach growing sections. Ripens middle of September.

HENRIETTA CLING—Yellow with a crimson blush. A large firm, juicy peach of most pleasing flavor. Ripens about September 20th.

PRICES ON PEACHES

Height in feet	Diameter in inches	Each	10	100
2 to 3	$\frac{5}{8}$ to $\frac{7}{8}$	\$0.25	\$2.00	\$16.00
3 to 4	$\frac{7}{8}$ to $1\frac{1}{8}$.35	3.00	25.00
4 to 6	$1\frac{1}{8}$ and up	.50	4.50	40.00

INDIAN BLOOD CLING—A very large cling peach, one of the best for pickling and preserving. Ripens about September first.

JAPAN BLOOD DWARF—This peach cannot be recommended too highly. It is Japanese origin. The tree does not grow large. It is a heavy bearer and should be thinned when heavy loaded with fruit. The fruit is of a dark red and red flesh. Juice is blood red. Looks like beets when canned. Freestone. Bears young. It is best early peach we have ever grown. No orchard is complete without this peach.

J. H. HALE—It ripens a few days ahead of Elberta. It is a deep golden color overlaid with bright carmine and of the best of quality. Whether in home orchard or commercial orchard, you should plant some Hale.

MAYFLOWER—Very early, ripening about June 10th. Large, very attractive, as it is a bright red. Flesh yellow. Semi-cling. Bears young.

RED BIRD CLING—A creamy white peach, almost covered with red. Large, hardy, and good. An extra early good cling. Ripens about July first. The same as Early Wheeler.

We especially recommend the varieties underscored.

APPLES

The First Fruit in Importance Is the Apple

Winesap

We pay personal attention to the selection of our scions and buds for our apple trees. Our buds are selected from hardy, thrifty bearing apple trees that have been producing good crops annually. In this way we not only are certain that our varieties are true-to-name, but we also know that they will produce unusually good crops of fruit of high quality. Our method insures you more vigorous trees that will bear younger and produce better crops than under any other method of propagation.

APPLE TREES—All kinds of apple and crabapple.

Two-year tops on three-year roots

Height in feet	Diameter in inches	Each	10	100
2 to 3.....	$\frac{5}{8}$ to $\frac{7}{8}$	\$0.30	\$2.80	\$25.00
3 to 4.....	$\frac{7}{8}$ to $\frac{9}{8}$.45	4.00	36.00
4 to 6.....	$\frac{9}{8}$ and up	.60	5.50	50.00

Summer Apples

EARLY HARVEST—A yellow apple known to most people. Good for home use.

LIVELAND RASPBERRY—One of the handsomest of summer apples, and among the best quality. Skin clear, waxen white, striped and mottled with crimson.

RED JUNE—Among strictly summer apples the Red June is the best. Its deep red color, excellent quality, and good bearing quality, makes it a favorite.

YELLOW TRANSPARENT—This variety is somewhat more conical than Early Harvest, more yellow and better flavored. The color is a clear, bright yellow when ripe, but the fruit is fit to use long before it reaches maturity. One of the earliest.

Autumn Varieties

GRIMES GOLDEN—This is the best early winter variety. It is a golden yellow color. Uniform in size, and possessed of a texture and flavor that is pleasing to the palate. Very good cooker. One of the best commercial varieties.

JONATHAN—The color is a cheerful red and waxy skin. Its juicy, snappy flavor makes it appeal to the consumer. One of the five best commercial varieties.

KING DAVID—Very productive, bearing good crops year after year. This variety is similar to Jonathan only more tart. Good size, very rich red, almost purplish black on the sunny side.

WINTER BANANA—This is not a winter variety as the name implies. Ripens in early fall. It is a clear yellow. Bears young, good cooking apple and one that should be planted more freely in this section.

WHEN TO ORDER

Just as soon as you receive this catalog make out your order and send it to us so that we may reserve the stock you want.

Our plants sell out early every year, and many customers who wait until planting time to order are disappointed. Orders are booked in rotation, and first orders receive first attention according to shipping date on order. This is the only fair thing to do.

The spring shipping season opens usually about February 20, depending on the weather and continues the greater part of May. Fall orders can be filled in October and November, but spring planting is best.

Nursery stock is not like dry goods! When the supply is sold out, it takes a whole year to grow more. Get your order in early so that we may reserve your stock until spring shipping time. **Don't be impatient about shipping dates as weather conditions often hinder the regular digging of stock.** We do our best to ship your order as specified.

HOW TO ORDER

Use the order blank provided in this catalog. **GIVE COMPLETE NAME AND ADDRESS, SHIPPING POINT, AND WRITE PLAINLY.** More order blanks sent upon request.

APPLES (Contd.)

Winter Varieties

BEN DAVIS—Striped red, large and attractive. Sure bearer. The tree is a rank grower. Its greatest fault is the quality.

DELICIOUS RED—It is delicious in every sense of the word. Beautiful red color. Most wonderful eating apple and demands a good price. The blossom end of the fruit is five-lobed. Good keeper and good cooking apple. Plant this apple.

YELLOW DELICIOUS—Many say this is the finest of all yellow apples. It bears young and heavily. The fruit is large, juicy and exceptionally fine quality. Every home should have at least one tree of this choice apple. Many firms ask a higher price for it, but we sell it right along with the others.

ROME BEAUTY—Of the large round, red apples this is one of the best. The flesh is firm, juicy, mild, pleasant flavor and excellent for eating.

STAYMAN WINESAP—This tree is a strong grower, and the fruit is large, mighty good apple. Color red. Its faults are that it sometimes cracks if the seasons are dry.

WINESAP—One of the oldest and popular varieties, being a good shipper and keeper in storage. Splendid bright red.

Delicious

Flesh tinged with yellow. Very firm, juicy and good flavor. The best commercial variety for this country. Eighty per cent of the trees growing in the commercial orchards of Kansas and Oklahoma are Winesap.

YORK IMPERIAL—An old-time favorite with many people. This variety is still planted in home orchard but not so much for commercial use.

**BUY FRUITS NOW WHILE
PRICES ARE DOWN!**

Crabapples

FLORENCE—A crab larger than the Transcendent. The quality is excellent. We have found this variety the best of all crabs.

WHITNEY—A popular crab of good size. Fruit is attractive yellow striped with red. Good quality.

TRANSCENDENT—The fruit is brilliant bright red of fair quality. The fruit is good for jelly and preserves.

We pay personal attention to the selection of our scions and buds for our apple trees. Our buds are selected from hardy, thrifty bearing apple trees that have been producing good crops annually. In this way we not only are certain that our varieties are true-to-name, but we also know that they will produce unusually good crops of fruit of high quality. Our method insures you more vigorous trees that will bear younger and produce better crops than under any other method of propagation.

PEARS

Kieffer Pear

Height in feet	Diameter in inches	Each	10	100
2 to 3	$\frac{1}{8}$ to $\frac{7}{8}$	\$0.60	\$5.50	\$50.00
3 to 4	$\frac{7}{8}$ to $1\frac{1}{8}$.70	6.50	60.00
4 to 6	$1\frac{1}{8}$ and up	.85	8.00	-----

DUCHESS—A large showy pear, often weighing a pound each; greenish yellow, rough uneven surface. We consider the Duchess to be the most

profitable dwarf pear in this section. The tree is dwarf; does not blight. Heavy bearer. Ripens September to October.

GARBER—The tree is thrifty and bears young. It is almost blight-proof. The fruit ripens the last of September and sells readily on the market. It is of medium size, yellow and well covered with red.

KIEFFER—One of the most popular market pears grown. The tree is a vigorous and upright grower, bears young and heavily, and is almost exempt from blight. The fruit is of good size, rich color and of fair quality. Ripens fall.

SECKLE—The Seckle is often called the Sugar Pear. This fruit is small in size but of excellent flavor. It is generally well known. Ripens August 15th to September.

THE NEW DOUGLAS—Beautiful, large, smooth pear with golden yellow color, flecked with russet. Flavor is delicious, sweet, melting and juicy. Blight-proof and resistant to disease. A regular cropper in all soils. Bears while tree is very young—some have fruit first year.

RASPBERRIES

Note:—We Offer You Two Grades

Two-year transplants are grown from 1-year plants set out in nursery row last spring, grown one year, taken up and they are ready with one year extra growth, and will bear fruit this coming summer if set out reasonably early this spring. In growth and production you will be one year ahead of others who grow Raspberries. They cost more than one-year plants, but we have grown them one year longer for you, therefore, you get a plant with a two-year root system which puts you one year ahead of the game.

One-year extra large are of bearing size with well developed one-year old root systems. After being set out, if the tops are cut back within 8 inches of ground line (and they should always be anyway), they often send out fruiting stems which bear berries this coming summer. This grade is very suitable for garden or field plantings where only the best is desired. Of course, they cost more than the next smaller size, but the size and quality is there and are at least double the other in value.

RASPBERRIES

There Is Nothing so Delicious as Raspberries

Winfield Rasp- berry

(The Wonder in Berry
Production)

This grand new blackcap originated at Winfield, and after ten years of testing has proved itself the "King of Blackcaps."

In hardiness and pro-
ductiveness it is unex-
celled by any other
variety. Has never win-
ter-killed through ten
seasons' fruiting, and
stands extreme
droughts.

The fruit is of enor-
mous size, single ber-
ries often covering a
quarter. Four to six great clusters are
produced on each cane, averaging from
three to six quarts to the plant. Fruit
is firm, sweet, rich and juicy; seeds very
small, fine flavor.

Bush is heavy and vigorous, making
robust, stocky canes, easily supporting
their heavy loads. Not troubled with rust
or anthracnose. Succeeds on all soils.

CUMBERLAND—The most widely
known black raspberry. Planted be-
cause of its productiveness and qual-
ity. Berries are extra large, fine and
sweet. It is usually hardy.

New Logan (Early)

80c Per 12 Plants

NEW LOGAN (New)—Earliest of all,
brings early market prices. Ripens a
week to 10 days ahead of others. Ber-
ries large, "meaty" and well flavored.
Experiment stations find New Logan to
be one of the most outstanding Black
Raspberries. Fine for home use. Berries
are large, not "seedy," one of the best
for table or canning, jams and the like.
New Logan plants are grown from
young healthy stock plants, not from
old fruiting plants that become weak
plants. We have only the best, most
vigorous and highly productive plants
for you, freshly dug, not storage
plants. One and two-year plants.
Quickest returns will be from the two-
year plants (transplants).

LATHAM—Yields twice as much as
other red raspberries. A new red rasp-
berry that was originated in Minne-
sota and acclaimed for its hardiness

New Logan Raspberry (Early) 80c per 12 Plants

in that state. During the past few
years its merits have spread with its
planting throughout the Middle West.
Produces very strong, vigorous canes,
very productive. Berries are large, of
highest quality, ripen evenly and hold
up well throughout the season.

Chief Red Raspberry

The New Hardy Disease-Resistant
Early Raspberry

CHIEF—The new Chief Raspberry has
been grown in test grounds all over
the country during the past ten years,
and has proven to be one of the best
varieties for Kansas and Oklahoma.

GRAPES—More Money Crops!

Concord Grapes

Agawam

AGAWAM (Rogers' No. 15)—The most widely known of the Rogers' Hybrids. The bunches are large. The berry is large, rich and sweet. The vine is vigorous. The Agawam ripens after Concord and can be kept much longer and improves in flavor. Seems to prefer clay soil. Of the red grapes, it is the easiest grown and one of the most dependable. For home and market use.

CONCORD—The only grape that is supreme for every purpose. Bunches measure 5-6 inches long and are very compact. Berries large, bluish-black, covered with attractive bloom. Juice rich wine-purple, sweet and delicious fresh or canned. Highest keeping and shipping quality. Vines hardy, disease resistant, and succeed on poor soil.

CACO—A vigorous, prolific grower. The Caco is a hybrid produced by hand pollenization of the Catawba and Concord. It is a perfectly hardy grape, beautiful, large wine-red. Extremely rich, sugary flavor. It is making good in all soils and sections, so that we can recommend it on the basis of performance. Ripens in advance of Concord. The vine is very strong, vigorous grower, healthy and prolific. The fruit sells in the open market at double the price of other varieties.

MOORE'S EARLY—Bunch of medium size and compact. The berry is very large, black and of good quality. Bears regularly, but not as heavy as Worden. It is a good market grape on account of its earliness, ripening the last of July.

NIAGARA—We believe this to be the best white grape grown. The bunches are large and long. The quality is of the best. Very hardy, bears regularly and abundant crops, and proves profitable as a commercial variety here.

SALEM—A rich, dark red, early grape of excellent flavor, as are all Rogers' Hybrids, ripening slightly before Concord. An excellent garden variety.

WORDEN—The best black grape we have found. The bunch is large, compact and ripens evenly. The berry is large, thin skin, and very fine flavor, rich and very sweet. The vine is perfectly hardy, bears heavy and is very prolific. The fruit readily sells at double the Concord price.

DEWBERRIES

The Dewberry is a dwarf and trailing form of the blackberry. The fruit is highly prized as a market fruit owing to its large size and fine quality. Set the plants two feet apart in the row and cover in winter with coarse litter. Should be mulched in the spring to keep the fruit off the ground.

Selected No. 1 Strong, Healthy Plants

Kind	Each	12	100
Thornless Dewberry	\$0.12	\$1.00	\$5.00
Lucretia	.10	.70	3.00
Austin	.10	.70	3.00

LUCRETIA—The best known and widely planted Dewberry. The fruit is large

and of good quality, very sweet and of delicious flavor. The canes are very vigorous and productive. Ripens early.

AUSTIN—Similar to Lucretia, but not its equal in the North. Recommended for our southern Oklahoma and Texas trade. It originated in Texas.

THORNLESS—This Dewberry is absolutely thornless. The bush is very hardy and makes a vigorous growth. Although being a late introduction, the Thornless Dewberry is of proven merit. It is a good bearer. The fruit is very large, jet-black, juicy, sweet, and of very fine flavor.

GOOSEBERRIES

An exceedingly profitable fruit when properly handled. The market is never supplied here to any extent. Gooseberries can be gathered and marketed over a long season. Every home garden should have a dozen or so bushes, as you will find gooseberries are very easy to grow. The fruit is extremely desirable for many uses. Gooseberries require very little room and attention.

Price: Heavy two-year plants, all varieties, 20c each; \$2.00 per dozen.

HOUGHTON—The old standard variety; bush drooping, hardy and prolific.

DOWNING—Larger than the Houghton, roundish; light green, juicy, fine quality; bush more upright than Houghton.

CARRIE—This variety originated in Minnesota and has proven hardy and vigorous in nearly all sections. The plant makes an exceptionally strong growth and produces larger crops of berries than any other variety we offer. When fully ripe the berries are red. Quality good.

PEARL—The finest berry we have tasted; very large, round, juicy, extra quality. Two-year bushes were covered with berries one inch in diameter.

ASPARAGUS

Asparagus is another delicacy that comes early from the vegetable garden. Like all very early vegetables, it costs quite a good deal; and yet a bed of asparagus in your garden will keep your table supplied and last for years. We handle two-year crown plants which will throw up sprouts for use the first year. Martha Washington,

Palmetto, or Con-	12	100	1000
over's Colossal	\$0.50	\$2.50	\$12.00

Why buy weak, slim, light-weight plants and wait for years to obtain an effect when Rogers' bushy, thrifty, well-rooted stock costs very little, if any, more?

ROGERS' RHUBARB

RIVERSIDE GIANT — Every family garden should support ten or more clumps of Rhubarb in heavily manured soil. Unfailing crops for many years to provide pies, fresh sauce, a canning supply, and cordial. Long, thick, brittle stalks surcharged with juice of refreshing flavor. Pink to carmen color; highly attractive to dessert dishes. 15c each, \$1.50 per dozen.

ROGERS' GIANT WINE-RED RHUBARB

This variety is the kind that is proving so successful and profitable to commercial gardeners. We have been growing this wonderful variety over a long period of years and thoroughly recommend it to our customers. Rogers' Giant Wine-red will not "seed" as it is propagated from divisioned plants. Every stalk is alike. All big and crimson-red in color. Very sweet and tender. 15c each, \$1.50 per dozen.

MYATT'S LINNEAUS — Large, most productive variety. The market for good Rhubarb is rapidly increasing. Myatt's Linneaus is especially in demand because long, large, juicy, bright green stalks sell best at good prices. 10c each, \$1.00 per dozen.

BLACKBERRIES PAY

Early Alfred Blackberry

Alfred has been grown by leading fruit growers and proven the Best Early Blackberry variety. We unreservedly recommend it to our customers as thoroughly satisfactory and the equal of any blackberry, early or late, when it comes to producing big crops and paying worth-while profits. Think of a bush full of tremendous big blackberries from 1½ to 1¾ inches long, practically free from seeds, coreless and with a thick pulp fairly bursting with sweet delicious juice. That's Alfred!

Alfred berries are bigger, brighter colored, of better flavor and bring better prices right along. Once you grow Alfred you won't be satisfied with any other berry—fine, large berries that carry well to market. The plant is such a vigorous, healthy grower that it produces a good crop the first year after planting. Withstands cold that kills less hardy varieties. Alfred will please you—whether raised for pleasure or profit. It is another of our splendid varieties—selected for its worth.

BLOWER—Highly recommended. Large size, good flavor, jet-black; good ship-

pers; hardy; prolific bearers. Does not winter-kill, and from all indications is a valuable kind.

EARLY HARVEST—This, along with Mersereau, is our favorite. The bush is perfectly hardy, cane stiff and upright. The fruit is of good size, long, and has very small seeds. The Early Harvest has never failed, despite our occasional dry seasons. In productiveness the Early Harvest is a surprise to everyone, the bushes being weighted to the ground with fruit. Set one-half of your acreage to this early variety.

MERSEREAU—Some nurserymen have a dewberry mixture in the plants which they are offering for Mersereau, which has hurt the reputation of this wonder blackberry. Our Mersereau are of the genuine strain, and we feel that for a late berry no variety is better. Our genuine Mersereau are, without a doubt, the blackberry of all blackberries. It is very large, jet-black, luscious and has all the qualities of an ideal berry.

All Heavy No. 1 Root-Cutting Plants				

One acre of Blackberries will net more cash money than thirty acres of wheat or corn. A proven fact for the past five years.

For Assurance in Growth and Production Plant Rogers' Blackberries

Note:—Rogers Offers You Root-Cutting This Year

This season we offer customers the best Blackberry plants grown. They are Root-Cutting plants. These plants are grown from pieces of fresh, healthy roots which are scattered in a shallow trench and allowed to calous over. From these pieces of roots grow out many fibrous roots, giving our plants wonderful root systems, excelling "sucker plants" commonly sold to growers.

Equal to 2-Year Transplants—Costs Less

Our extra large Root-Cutting Blackberry plants are equal in value, size and root system to many 2-year Blackberry Transplants. It's the root system that counts and Root-Cutting Blackberry plants have that to a perfected degree. The tops of our Root-Cutting Blackberry plants are large enough to be of "bearing age."

HORSERADISH

Selected Bavarian variety. Excellent for home use; easy to grow. The crowns are the whole root and will make hills the first year. The cuttings are piece roots. We can furnish either crowns or cuttings. Crowns, 5 for 50c, 10 for 90c, 25 for \$2.00. Cuttings, 25c per 10, 50c per 25, \$1.50 per 100.

SAGE PLANTS

The good, old fashioned kind that you use for seasoning sausage and in dressing for chicken, turkey and duck. Order a dozen plants as the home grown product is far superior in quality and seasoning to that which is grown and packed commercially. 3 for 40c, \$1.25 per 10.

STRAWBERRIES

AROMA—Another fine old variety that has retained its popularity down through the years. The fruit is large, bright red and of delicious flavor. A good shipper on account of its firm texture. The period of bearing is long and it is a heavy fruiter, but does not bear as heavy as the Senator Dunlap. The Aroma is the commercial strawberry of the Ozark region, because of its good shipping qualities. 75c per 100, \$6.00 per 1000.

BLAKEMORE—An early variety originated and developed by the United States Department of Agriculture, and has been thoroughly tested in all parts of the country. Dark red fruits of good quality and fine flavor. Because of its excellent keeping and shipping qualities, it is becoming a popular variety in the South to ship to the early Northern markets. 75c per 100, \$6.00 per 1000.

DORSETT—50 Plants 69c—The new extra-early, frost-proof, self-pollenizing standard-type Strawberry which withstands drought and excessive rainfall better than other varieties. Makes well-filled rows of gigantic plants. Large, uniformly-shaped berries, mature to full size. Bright, glistening, flame-red, ripening evenly all over. Berries do not bruise, fade or darken after picked — always look fresh-picked! Flavor deliciously sweet and satisfying. Covers extra-long fruiting season. Best keeping and shipping quality of any strawberry! The first strawberry that has filled every claim made for it! Prices: 25 plants for 39c; 50 for 69c, 100 for \$1.25, 200 for \$2.15, 1000 for \$9.95.

FAIRFAX—Medium-early, self-pollenizing, frost-resistant, standard type. Make well-filled fruiting rows. Thrive on heavy land, but succeed on any fertile soil. Immense berries, of uniform size and plump shape. Dark, carmine-red to the center, ripen to an even color. Uniformly firm in flesh and skin, giving them supreme shipping quality. Have won highest praise for their fancy eating quality. Look better—taste better—and are better than older varieties! Don't delay — get started with Fairfax this year! Prices: 25 plants 39c, 50 for 69c, 100 for \$1.25, 200 for \$2.20, 1000 for \$10.00.

SENATOR DUNLAP—There is no known variety that is so universally popular nor one that is so extensively grown

as the grand old Senator Dunlap. The fruit is very large, rich red, and of remarkably fine flavor. In addition to this, it is a heavy producer, a splendid keeper, and cannot be excelled for shipping. The fruit begins to ripen soon after the earliest sorts and continues until near the end of the season. The plant is unusually hardy, stands our summer drouths well, and will respond readily to care. 75c per 100, \$6.00 per 1000.

Mastodon Everbearing Strawberry

Without a doubt this is the ever-bearing Strawberry. In the spring crop the berries are large, sweet, well flavored and will equal Senator Dunlap for bearing qualities. It bears excellently during the summer months and also does extra well during the fall bearing season. This variety is good and we heartily recommend that each of our customers buy a hundred or two hundred plants for their garden. \$2.00 per 100, \$5.00 per 300, \$12.00 per 1000.

Delicious Youngberry

This new fruit, a cross of the Loganberry and the Dewberry, has become very popular, planted from coast to coast. It has such a wonderful flavor, delicious to eat fresh, and makes the finest sauce you ever tasted. The fruit is very large, a handsome dark wine-red color, sweet and delicious, highly flavored, almost seedless. A tremendous bearer. It is a very easy plant to grow. No other fruit has become so popular in such a short time. Plant some this spring; you are sure to like them.

Prices on Youngberry, Select Plants — 3 for 30c, 6 for 50c, 15 for \$1.00, 25 for \$1.55, 50 for \$2.85, 100 for \$4.95.
